

EXPLANATION

INDIANA GEOLOGICAL SURVEY

PETROLEUM WELL SYMBOLS

The following symbols provide all of the petroleum well symbols used by the Indiana Geological Survey. These symbols may be located using the three numbers listed below to provide additional information about the status or source data for a particular well. This list may indicate symbols not shown on this particular map.

permitted location

dry hole

oil

gas

shuttle gas

other gas

observation

observation borehole gas

observation borehole gas storage

Tension well possibly productive; only available information is uncertain location

three others

abandoned

completion type uncertain

location uncertain

Petroleum field boundary encloses wells classified in a single test, but is not intended to indicate the extent of producing reservoirs.

Artificial township boundary

gas storage

gas storage formerly oil

gas storage formerly oil</div
